

## **CLAIM LISTING**

1.-44. (Canceled)

45. (Previously Presented) An absorbent article, comprising:

    a composite web comprising a creped nonwoven layer and a perforated elastic layer having first and second surfaces, the perforated elastic layer and said creped nonwoven layer being bonded together at bonding points consisting essentially of a plurality of points on said first surface and a plurality of points on the nonwoven layer, wherein the elastic layer comprises a first non-elastic skin layer; a second non-elastic skin layer; and an elastic core between the first and second skin layers.

46. (Previously Presented) The absorbent article of claim 45 wherein the elastic layer comprises a three-dimensional apertured film.

47. (Previously Presented) The absorbent article of claim 45 wherein the elastic layer comprises a two-dimensional apertured film.

48. (Previously Presented) A composite web comprising a creped nonwoven layer and a perforated elastic layer having first and second surfaces, the perforated elastic layer and said creped nonwoven layer being bonded together at bonding points consisting essentially of a plurality of points on said first surface and a plurality of points on the nonwoven layer, wherein said nonwoven layer is constructed of a non-elastic material and said nonwoven layer is activated.

49. (Previously Presented) The absorbent article of claim 48 wherein the elastic layer comprises a three-dimensional apertured film.

50. (Previously Presented) The absorbent article of claim 48 wherein the elastic layer comprises a two-dimensional apertured film.

51. - 53. (Canceled)
